Here's how to get your students started using DreamBox!

Print this page! You can return here using the First-time Setup link on the left side in the "Manage Students" section.

1

Save your custom DreamBox Site Internet Address on student computers.
Your address is: https://play.dreambox.com/login/t89h/edgartowns. Save this address as a 'favorite' or desktop shortcut on all computers that students will use. Students will click on the DreamBox link, select their class, log in, and start learning independently.

2

Setup DreamBox on student iPads.
Your School Code is: t89h/edgartowns
You will first need to download DreamBox Math for iPad. Search for "DreamBox Math" in the App Store, or go to http://www.dreambox.com/ipad. Once the app is launched, enter your School Code when prompted.

3

Get to know the DreamBox program. Watch video tutorials on getting started or visit the Resources & Support Center.

4

Tips for Teachers

First session only: Students may be prompted to select their password. Additionally, students using the Primary learning environment will choose a DreamBox game character, theme, and story within the program to build engagement and ownership. **This means your students' first session using the Primary learning environment will not include as much math as later DreamBox sessions.**

Hundreds of in-depth lessons are available in DreamBox's two learning environments.
- **Students working in the Primary learning environment should spend most of their time in the Adventure Park.**
- **Students working in the Intermediate learning environment should spend most of their time in the My Lessons area.**

Additional Information

- **Encourage students to complete lessons,** even if they find them difficult, rather than abandoning them in the middle.

- **Use the Feedback button** at the bottom right corner of each screen to contact our support team about DreamBox math lessons, level of difficulty, or technical issues.

- **Contact us for help at any time!** Call us at 877-451-7845 (Monday-Friday, 7am to 5pm, Pacific Time) or email support@dreambox.com.

All ready? Now you can start students learning!
